Canon

THE MAGNIFICENT 8 FEATURES OF THE imagePROGRAF GP series

The imagePROGRAF GP 7-colour series is available in GP-2600S (24”), GP-4600S (44”) and GP-6600S (60”) versions, each allows printing premium posters in-house – so you can boost productivity without compromising on quality.

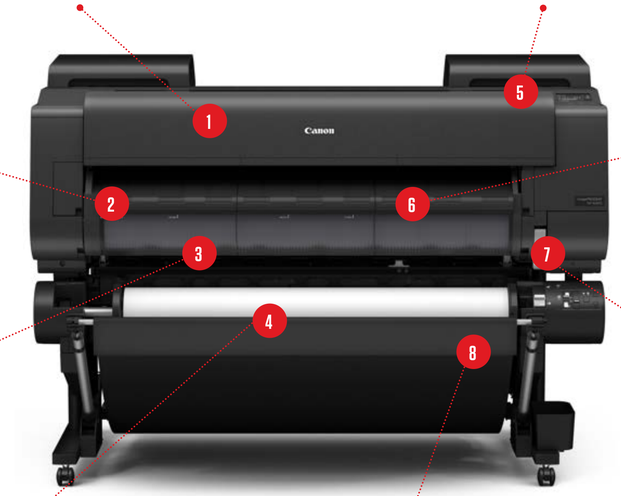
YOUR PERFECT PRINTER WILL HAVE:

PROFESSIONAL PRINT QUALITY

STAY PRODUCTIVE

PANTONE™[1] CALIBRATED FOR COLOUR COVERAGE[3]

STREAMLINE YOUR WORKFLOWS



FUTUREPROOF YOUR PRINTS

SOFTWARE SUPPORT FOR POSTER CREATION

QUALITY YOU CAN RELY ON

A SUSTAINABLE APPROACH TO PRINTING

1. PROFESSIONAL QUALITY

With the imagePROGRAF GP 7-colour series, you can dive into a world of captivating corporate colours and enhanced black density for greater depth.

The imagePROGRAF GP 7-colour series goes beyond ink - it will help you create premium posters with exceptional print quality - perfect colour gradation, total colour accuracy and most impactful colours.

2. PANTONE™[1] CALIBRATED FOR HIGH COLOUR COVERAGE

Unlock an eye-catching spectrum of colours with PANTONE[1] precision, thanks to the innovative new LUCIA PRO II ink formula[3], esepcially new orange ink. You can look forward to an enlarged colour gamut with wide PANTONE™ coverage[2].

So, businesses can print with confidence that they can produce eye-catching posters, with corporate colours reproduced with striking accuracy.

3. FUTUREPROOF YOUR PRINTS

Don't just print images that look good today – with the imagePROGRAF GP 7-colour series, you can produce stunning prints that will last a lifetime.

The new LUCIA PRO II ink formula featuring a special high light-resistance pigment that will preserve your prints for 200 years[4], with the improved light-fastness protecting against light damage without affecting colour development. And scratches are nothing to be feared either, with high scratch resistance ink for more durable prints.

4. QUALITY YOU CAN RELY ON

We've designed the imagePROGRAF GP 7-colour series to be a printer you can rely on to get the job done.

Print head management has been improved – with print head monitoring and auto alignment adjustment, issues relating to print heads and ink ejection are spotted before printing begins, minimising colour shift and image deterioration to ensure print quality is always reliable.

5. STAY PRODUCTIVE

Looking for a printer that allows you to get more done? The imagePROGRAF GP 7-colour series offers a range of features to help you print superior images, quickly, and without downtime.

Automatic media loading streamlines your workflows – simply place the roll in the feeder and the printer takes care of the rest, detecting media type and remaining media levels. The dual roll enhances productivity further, allowing a single printer to take on multiple jobs using different paper types. And with high capacity hot swap ink tanks and the mirrored ink arrangement, you can print at high speed while minimising downtime.

6. STREAMLINE YOUR WORKFLOWS

With the imagePROGRAF GP 7-colour series, you don't need to choose between quality and ease of use – its designed with simplicity at its core.

Transform your workflows with easier media handling and simplified settings that save you time. The media configuration tool makes it easier to register custom media. Free size Borderless Printing helps reduce time spent on trimming borders for posters. And a new LED interior light and roll media size indicator help you keep track, backed by a 4.3" display with improved user interface for easy access to important information.

7. SOFTWARE SUPPORT FOR POSTER CREATION

Stay ahead in the competitive business landscape. The imagePROGRAF GP 7-colour series allows you to create eye-catching posters and photographs in-house for flexibility and time saving.

It seamlessly integrates with various software, including PosterArtist, Adobe Illustrator, and Photoshop, to help you create posters, banners, and flyers, ensuring accurately striking corporate colours without the need for extra training.

8. A SUSTAINABLE APPROACH TO PRINTING

A sustainable approach to printing Sustainability has never been more important to businesses across the world. It's why we designed the imagePROGRAF GP 7-colour series to be an environmentally conscious choice.

It's EPEAT Gold rated[5] for lower power consumption during both operation and power-off. And we've also used less expanded polystyrene (EPS) in the packaging[6], too.

1. PANTONE™ is a trademark or registered trademark of Pantone LLC.
2. PANTONE FORMULA GUIDE Solid Coated colour gamut coverage rate is 96% for GP-6600S/4600S/2600S, when using Premium Semi-Glossy Paper 2 with imagePROGRAF printer driver at [High] [Color Correction Off]; coverage rate is 82% when using Heavyweight Coated Paper HG with imagePROGRAF printer driver at [High] [Color Correction Off]
3. 5 out of 7 inks are newly developed. The matte black and orange ink are the same as those used by the imagePROGRAF GP-2000/4000.
4. When using Canon Heavyweight Coated Paper HG 145gsm. Predicted value calculated in accordance with the indoor light resistance test method and life evaluation criteria of the digital colour photographic print image preservation evaluation method (JEITA CP-3901B) published by JEITA (Japan Electronics and Information Technology Industries Association).
5. EPEAT Gold registered in the U.S.
6. The packaging of GP-2600S is free from expanded polystyrene, the others are with 89.5% reduction in polystyrene (not including the second roll unit).
